

Webinaire ARNiA Qualité des Données Géographiques avec QGIS

<https://github.com/CEREMA/quadogeo/tree/master/formation>

A vibrant, multi-layered landscape illustration. The scene is composed of numerous horizontal bands of different colors, including shades of green, blue, orange, red, and purple. These bands are arranged in a way that creates a sense of depth and movement, with some layers appearing to rise and fall. Various types of plants, including grasses, shrubs, and trees, are scattered across the different layers, adding to the complexity and richness of the image. The overall effect is one of a fantastical, multi-dimensional environment.
